

Kuwait Utilized ZKTeco's Attendance Management Solution in their Ministry of Education 43rd Conference

Kuwait's Ministry of Education supports an educational policy which aims to provide great opportunities to all children regardless of their social class and including with those who have special needs. The Ministry of Education is organizing an annual conference where they strive to improve the quality of the education in Kuwait.

Challenge:

The Ministry of Education organized the 43rd Conference which will be conducted for three days. With the huge population of teachers, professors, and other officials, the Ministry of Education requires a registration and attendance machine to easily monitor the entrance of the gates. The client needs all attendance information to be organized according to provinces, schools, and universities. The hall composed of 5 gates in where they need to put the attendance machines.

In addition with the attendance machines, the client requires to have the complete attendance reports and information to be printed out after the three-day conference.

Products Used:

- IN01
- Thin Proximity Cards
- iClock700
- ZKTime Software

Solution:

With ZKTeco's Time and Attendance Management Solution, all of the client's need was met. We have received a list of information of the teachers, professors, and officials in an Excel sheet which are transferred in the ZKTime Software. All the names were then uploaded to the attendance machines: IN01 and iClock700. The client has used attendance machines in which these devices are installed in each gates. More than 1,500 people were registered in the machines using thin proximity card. Each person was given a proximity card to punch in before entering the hall.

After the three-day conference, all the logs in the device have been transferred back into the ZKTime Software to calculate all the data that has been stored.

Result:

In the past years, the Kuwait Ministry of Education is using manual paper logs where the officials sign to verify their attendance. Compared to this, having an attendance machine conserves a lot of work and time. People don't need to pile up in the entrance gate and wait very long to confirm their attendance anymore. With IN01 and iClock700, the flow of entry has been made easy and fast. The client was impressed with the accuracy and precision of the new process of registration and attendance. From manual paper logs to attendance machines, the level of professionalism was taken to a higher level.
